

HALO·ROVE™

Commercial Air Purification System
By RGF Environmental

The HALO-ROVE™ Commercial Air Purification System

The HALO-ROVE™ utilizes RGF's patented Photohydroionization® (PHI-CELL®) technology to substantially reduce airborne and surface bacteria, viruses, odors, mold and VOCs (chemical odors). The HALO-ROVE™ is designed as a standalone, portable active air purifier capable of treating up to 1,000 square feet.

Why Use RGF's Photohydroionization® Technology?

Photohydroionization® (PHI) is an active air treatment technology. Active air treatment is the process of reducing air and surface contaminants by recreating safe, natural levels of hydrogen peroxide (H₂O₂) in occupied areas.

RGF's patented PHI-CELL® technology combines a photocatalytic process and a multiwavelength UV source to create active air purification. The combination of UV light and a hydrated quad-metallic catalyst drives a reaction that produces low level, airborne H₂O₂. RGF's PHI-CELL® air treatment systems are operating safely in over four million installations globally.

HALO-ROVE™ – Commercial Air Purification System

The HALO-ROVE™ quietly circulates air around the space while creating and distributing low-level airborne hydrogen peroxide (H₂O₂). Testing shows significant reductions in viruses, bacteria, mold, and odor within minutes of operation, resulting in safe, clean air within the treated space.

Ideal for use in:

- Offices
- Classrooms
- Conference rooms
- Daycares
- Restaurants
- Bathrooms
- Boats
- Locker rooms

ITEM#	REPLACEMENT CELL	ELECTRICAL	WATTS	DIMENSIONS	SHIP WT.
CAPS-CMTR-120-R	PHIC-CAPS-CMTR	120 VAC	12	18"W x 6.25"H x 6.25"D	5 lbs.

•Materials:	Stainless steel housing
•PHI-CELL® Replacement:	Recommended after 18,000 – 25,000 hrs.
•Warranty	1 year
